

Serial No. 10/688,812

Attorney Docket 1771.01

CLAIM AMENDMENT

Claims 1-6 (canceled)

Claim 7 (currently amended) A barbecue grill:

- a) a gridiron disk;
- b) a shaft extending from the gridiron disk so that the shaft becomes substantially perpendicular to the gridiron disk;
- c) a bowl having a channel, wherein the shaft is detachably received through the channel;
- d) a tray having a center opening, wherein the tray is provided between the gridiron disk and the channel so that the shaft passes through the center opening, wherein the tray is partitioned to a first half and a second half, wherein the first half has a plurality of pores; and
- a) a motor attached to the bowl to generate rotation of the shaft.

Claim 8 (original) The barbecue grill of claim 7 wherein the gridiron disk is formed of a plurality of linear wires.

Claim 9 (original) The barbecue grill of claim 7 wherein the gridiron disk is formed of a plurality of linear and circular wires.

Claim 10 (original) The barbecue grill of claim 7 wherein the shaft is detachably attached to a center of the gridiron disk.

Claim 11 (original) The barbecue grill of claim 7 wherein the channel is formed through a bottom center of the bowl.

Claim 12 (original) The barbecue grill of claim 7 wherein the motor is formed underneath the bowl.

Claim 13 (canceled)

Claim 14 (currently amended) The barbecue grill of claim ~~13~~ 7 wherein the second half of the tray is devoid of pores.

3

Serial No. 10/688,812

Attorney Docket: 1771.01

Claim 15 (canceled)

Claim 16 (original) The barbecue grill of claim 7 wherein a lower end of the shaft is detachably fit in a top portion of the motor.

Claim 17 (original) The barbecue grill of claim 7 further comprising a heat insulator between the bowl and the motor.

Claim 18 (original) The barbecue grill of claim 17 wherein the heat insulator is formed in a staple format to include a base and a vertical support raised from each side of the base, wherein the vertical support serves to allow an air gap between the bowl and the motor.

Claim 19 (original) The barbecue grill of claim 7 wherein when the motor is turned on the gridiron disk makes a clockwise rotation whereas the tray remains stationary.

Claim 20 (original) The barbecue grill of claim 7 wherein when the motor is turned on the gridiron disk makes a counterclockwise rotation whereas the tray remains stationary.

Claim 21 (original) The barbecue grill of claim 7 wherein the gridiron disk is radially embossed.

Claim 22 (original) The barbecue grill of claim 7 wherein the gridiron disk is marginally stepped.

Claim 23 (original) The barbecue grill of claim 16 wherein the lower end of the shaft is substantially angled in a polyhedron format.

Claim 24 (new) A barbecue grill:

- a) a gridiron disk;
- b) a shaft extending from the gridiron disk so that the shaft becomes substantially perpendicular to the gridiron disk;
- c) a bowl having a channel, wherein the shaft is detachably received through the channel;

Serial No. 10/688,812

Attorney Docket: 1771.01

- d) a tray having a center opening, wherein the tray is provided between the gridiron disk and the channel so that the shaft passes through the center opening, wherein the tray is partitioned to a first half and a second half, wherein the first half has a plurality of pores, wherein the first half of the tray is substantially embossed; and
- b) a motor attached to the bowl to generate rotation of the shaft.

Claim 25 (new) The barbecue grill of claim 24 wherein the second half of the tray is devoid of pores.

Claim 26 (new) The barbecue grill of claim 24 further comprising a heat insulator between the bowl and the motor.

Claim 27 (new) The barbecue grill of claim 26 wherein the heat insulator is formed in a staple format to include a base and a vertical support raised from each side of the base, wherein the vertical support serves to allow an air gap between the bowl and the motor.

Claim 28 (new) The barbecue grill of claim 24 wherein when the motor is turned on the gridiron disk makes a clockwise rotation whereas the tray remains stationary.

Claim 29 (new) The barbecue grill of claim 24 wherein when the motor is turned on the gridiron disk makes a counterclockwise rotation whereas the tray remains stationary.

Claim 30 (new) The barbecue grill of claim 24 wherein the gridiron disk is radially embossed.
